

## ***Caltrans Office Engineer*** **Contract Status and Project Plans** **Web Sites**

### **Office Engineer Contract Web Site Overview:**

The Office Engineer *Web Site* contains valuable information regarding Roadway and Structures projects on the California Highway System, currently in an Advertised and / or Contract Awarded status.

Information available in these pages consist of complete advertised sets of plans, Addenda, Federal Wages and Specifications to Caltrans Standard Plans, Standard Specifications and Cost Summaries including the current Asphalt Price and Construction Cost Index. Bidder specific information, such as Summaries and Results, Plan Holders List, Bid Locations, Bidder Inquiries and Award Status updates are updated regularly. [Click here to return to the main OE page.](#)

### **Contracting and Standards:**

Contractors involved with Caltrans projects can use the ***Contract Standards*** section of the site to locate and download Construction Contract Standards. Included are the new Dual-Standards "Standard Plans" and "Specifications". [Click here to go to the Construction Contract Standards page.](#)

### **Advertised Contract Documents:**

Office Engineer has provided (2) internet web sites which offer public access to advertised Plan sets, Proposal, Special Provisions, and Wage information for prospective bidders, subcontractors or vendors. However, Contractors wishing to submit bids for DOT contracts, must still obtain bid documents (Proposal, Special Provisions and Plans) from the Caltrans Project Plans Counter, located at 1120 N. Street, in Sacramento. This is for contractor tracking and addenda purposes. [Click here to go to the Plans Counter ordering and Bid Locations page.](#)

[The Project Document Distribution Site](#) (IntraNet Docs) provides a search engine for locating projects using a simple form entry system. The results can be viewed on any web browser (no viewer necessary), and can be downloaded into a convenient multi-page TIF format, where printing can be done on your local printer.

[The Office Engineer Advertised Projects web site](#) is a standard HTML based page that takes the user to a directory based listing sorted by district number, and then by contract number. The user can copy the files individually or select the complete project plans set provided in a convenient "zipped" format. (example.. 10-123451.zip)
